KF-200 Knife Folding

Add in-line folding to your existing setup for superior in-line folding with heavier paper stocks.

The Count KF-200 Knife Folder is the perfect companion to Count creasers for users who want to add in-line folding of digital media. It's also compatible with most other brands of "one-up" creasers. This machine is ideal for use in applications with heavier stock up to 350 gsm card stock, thicknesses that buckle folders aren't capable of. The KF-200 gives you a clean fold without cracking or bending the stock.

The KF-200 is equipped with a variable-speed, delivery conveyor featuring a unique proximity sensor that detects movement and ensures the smooth, even flow of folded paper onto the exit tray.

- Supports heavy paper stocks up to 350 gsm
- Compatible with most other brands of "one up" creasers
- Automatic sheet setup for 6 common folds
- User-friendly touch screen control

Features

- Compatible with almost any creaser
- Built-in micro-adjust feature compensates for variances in folds settings of different creasers
- User-friendly touch screen for easy setup and controls
- Simple adjustment control keeps paper feed aligned at all times
- Clear top lid provides visibility and easy internal access for maintenance
- Innovative sensor at paper exit automatically moves sheets, keeping the exit clear
- Comes with 6 pre-set folds; plus 4 memory save slots for custom fold options
- Strong and durable components
- 43% lighter than competitive in-line folders making it easier to handle and maneuver
