

Genano® 310

Item# 04GEN310

High-Performance Air Purification Kills COVID-19, Flu, Cold, Bacteria, Mold Spores, & more

The innovative Genano 310 air purifier is the only air filtration system on the market that collects and actually kills trapped particles from airborne aerosols, completely eliminating them from the air in your office building. This impressive air purifier is a show-stopper, actually killing many viruses, including COVID-19, cold, flu, and more. It also purifies the air from other harmful particles, such as pollen, smoke, mold spores, and more. It is a self-cleaning system that requires only a replenishing of the cleaning solution about every 5-6 weeks, and a carbon canister replacement about annually.

Genano – Pure Air. Nothing Else.

Genano technology

– Patented nanoscale cleaning method

Genano's patented electric air purification method purifies indoor air even of nanoscale impurities. The method eliminates organic microbes such as viruses, bacteria, mold, allergens, and more. In addition, the method removes dangerous VOCs and smells

- 1 Contaminated air is led inside the unit
- 2 Harmful particles are become negatively charged. The negatively charged particles are attached to the positive collection chamber. Organic microbes are destroyed with electronical shocks.
- 3 The air is lead to active carbon collector which effectively removes VOC gases and odors
- 4 Outcoming ultra-pure air is completely free from particles of all sizes, microbes, harmful gases, and chemicals.
- 5 An automatic washing function activates once a week, keeping the machine low-maintenance and the efficiency high.
