

- Increase productivity up to 15%
- One box of SnakeSkin™ Wire-O® holds up to 3 times as many loops as a spool depending on size and pitch
- No spool changing which saves time while increasing productivity
- Quick consistent and easy set ups
- Eliminates tangling - SnakeSkin™ Wire-O® is encased in plastic wrap which prevents the wire from tangling
- Eliminate wasted wire and down time caused by tangled wire therefore reducing waste costs
- Reduces risk in transport and damage
- Reduces waste management so you don't waste time dismantling spools or incur costs associated with disposal
- Reduces costs in storage and handling
- This product is recyclable.

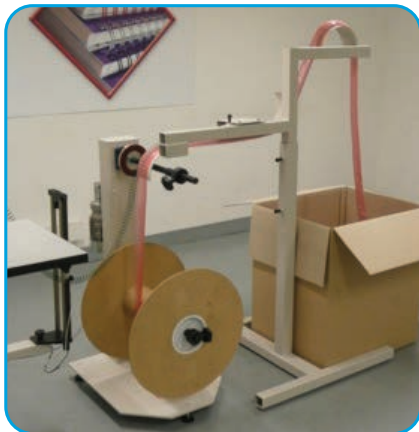

SnakeSkin™ Wire-O® can be fitted to work with the the following machines:
James Burn BB400 Speedbind, BB50H, BB43; Renz Auto Bind 500, 700, 900,
and RSB360; Rilecart in-line binders; Bielomatik in-line binders; Sickinger
STL1000 (with modifications)

Now choose original Wire-O® on spools or in our new **SnakeSkin™ Wire-O®** Wrapping!

Proud winner of the Binding Industries of America's Bill Feingold Award - Best Innovative Product for 2010

What is **SnakeSkin™ Wire-O®**? **SnakeSkin™ Wire-O®** is Wire-O® that is packaged in a flexible plastic "Skin" that completely protects the wire, while gaining more loops per box. By removing the Spool core we are able to package 3 to 5 times as many loops into a box! The result is fewer changeovers and downtime in your binding operation equaling more books bound per day. In addition the disposal costs associated with traditional spools is completely eliminated!

Size	SSW Loops/Box	Loops/Spool	Spool Equivalent/Box
5/16"	174,000	66,000	2.6
3/8"	126,000	47,000	2.7
7/16"	110,000	32,000	3.4
1/2"	85,000	26,750	3.2
9/16"	70,000	22,000	3.2
5/8"	37,000	11,000	3.4
3/4"	27,000	8,000	3.4
