

MAX AND BIG BENCH

Max

The Keencut Max is designed to cut super-wide materials from 160" to 200", while executing precise cuts- accurate to within .08" over the full length of the cut.

The Max uses standard utility blades while also featuring a blade depth adjustment and a spring-loaded blade ejector. The utility blades will cut to a depth of 3/8" (10mm) and the XR blades cut to a depth of 1/2" (13mm).

Big Bench

Constructed of strong anodized aluminum extrusions, the Big Bench with Max creates a solid and precise cutting table and workstation. The stability of the Big Bench with individual level adjustment on each leg provides a firm and flat work surface to ensure extreme accuracy.

Surface Mounted Lift & Hold Mechanism is affixed to the table by screws, ultimately securing the cutter bar in place to prevent shifting while cutting.

Textile Cutting Tool

Max can also accept an optional 28mm textile cutting wheel.

Item #	Description
69140	28mm textile cutting tool
69141	28mm textile cutting wheels (10)

Worktop not included
with Bench.
