

NeuraLabel Sprint

Single- and Short-Run Label Printer

The new NeuraLabel Sprint can easily print as few as one label at a time or as many as thousands to conveniently meet your needs.

The all-new Sprint is the latest in label printing technology from NeuraLabel. This innovation is the perfect solution for those who require short print runs, but still need the same full-color, high-resolution print quality you have come to expect from NeuraLabel.

The Sprint gives you labels in a fraction of the time of typical labeling systems. Its small footprint and user-friendly interface makes this a true on-demand desktop label printing solution.

Flexible Printing

The Sprint can print on media widths less than one inch up to 8.5 inches, making the Sprint a versatile and economical label printing solution.

Integrated gap sensors eliminate the need for preprinted registration marks, reducing your media costs. Additionally, the Sprint includes an optional built-in cutting system to dispense labels in one easy step.

Robust Construction

The Sprint is constructed with durable and lightweight aluminum, so your printer will last a lifetime. It includes an optional media roll unwinder for longer print runs.

Specifications
