**95 Spikes
Destroy All the
Memory Chips
on Your SSDs!**

PDS-SSD Destroyer

Paired with the NSA Listed PDS-75 or PDS-100, the PDS-SSD Destroyer adds solid state destruction assurance by destroying the individual chips containing data - preventing information from being retrieved.

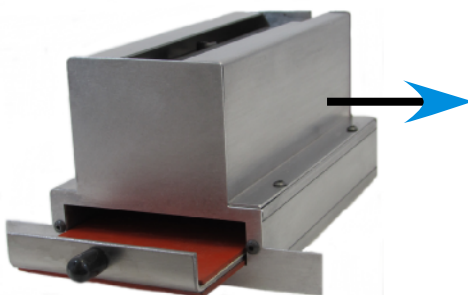

This SSD destruction option can be purchased at any time and added to your current destroyer with no factory installation. Simply replace the debris tray from your destroyer with the SSD Insert - takes less than 10 seconds and no tools required!

Destruction Chamber/Max Media Size:	0.5"H x 3"W x 6"D (13.2mm x 73.7mm x 152.4mm)
Media Taken:	Standard SSDs, cell phones, SIM cards, flash drives, USB thumb drives, SSHD controller boards, etc.
Destruction System:	95 Large Spikes
Cycle Time:	8 - 10 Seconds
Operation:	Automatic sensor start or manual (can operate w/o electricity)
Dimensions:	3.72"H x 5.34"W x 6.22"D (94.5mm x 135.6mm x 158mm)
Weight:	3.5 lbs. (1.59 kg.)

Simple Operation

1. Place the insert into your destroyer (automatic or manual).
2. Pull the insert drawer out and place media inside. Close drawer.
3. Operate the destroyer normally. The blade will come down into the insert (through the slot on top) and press down on the internal plate.
4. The plate will push the 95 spikes down through the media and return to the normal position.
5. Open the drawer and remove the punctured/perforated media.
(Drawer is fully removable - operator does not have to handle damaged media)

**No Need to Buy Media
Transport Sleeves to
Handle Small Flash or
Thumb Drives!**
