MATERIAL SPECIFICATION SHEET

Channel (Embossed) Vacuum Bags

Product: Channel Vacuum Bags, (SKU: MR)
Description: 3.5mil textured (embossed) film with 4mil smooth poly/nylon
Application: Cost-effective FDA approved film used extensively for demanding, vacuum applications found in a variety of industries. It was developed specifically to be used with home vacuum machines that cannot function with a flat “industrial grade” vacuum bag. The deep diamond embossed material is employed on one side of the pouch. The films extensibility (ability to stretch) allows it to conform to unique product geometry. Low oxygen transfer rate, high impact resistance and its low cost make it popular with meat, fish, nuts, dried fruit, jerky, and snack products.
