

Reveal™ Backlit Film

Print Media

Reveal™ backlit film is specifically designed for illuminating graphics and clearly displaying your message. This 180µ (7 mil) high quality, printable matte polyester film effectively transmits light, dispersing it evenly and consistently across an image. It provides superb adhesion for both UV and latex inks when printed on the front side. Reveal™ backlit film also has an excellent white point that creates vibrant graphics. Available on a 3" core.

Typical Applications

- Outstanding choice for backlit graphics in airports, museums and malls.
- Can be used for outdoor backlit applications at bus or train stations.

Recommended Printer Platforms

- UV
- Latex

Features and Benefits

- 180µ (7 mil) thickness
- High quality matte white PET
- Printable on front side
- Excellent print quality
- Anti-static, anti-slip treatment on the back side keeps message securely in place
- White point allows for use with table cutters
- Rigidity allows graphics to be more easily inserted into light boxes
